

Modelo de Regresión Lineal Múltiple

Modelo RHS: $\hat{Y} = \hat{\beta}_0 + \hat{\beta}_1 X_i$

$$Y = \beta_0 X_i + \epsilon$$

$\hookrightarrow -17,579$
 $\hookrightarrow 3,932$

$$\hat{Y}_i = -17,579 + 3,932 X_i$$

$$\left\{ \begin{array}{l} H_0: \beta_k = 0 \\ H_1: \beta_k \neq 0 \end{array} \right. , k=0,1$$
